

ISO 22301

Business Continuity Management

Build and maintain a cyber resilient business

ISO 22301, the internationally recognised standard for Business Continuity Management, provides an effective framework to help you identify and prioritise the unique threats facing your business, before they happen.

Ideal for

Any organisation wishing to ensure delivery to customers, minimise the impact to operations, reputation and revenue after an incident.

How we deliver

In person onsite, and remote.

Why ISO 22301 Business Continuity Management with CyberCX?

When an unexpected incident occurs, comprehensive incident management and business continuity plans are critical for minimising the impact to operations, reputation and revenue.

Organisations need to be prepared to face a diverse range of challenges. These may include risks associated with market forces, extreme weather events, terrorism, pandemics, disrupted supply chains or third-party failures. Increasingly, organisations also recognise the importance of being prepared for cyber incidents, including data breaches, ransomware, and system failures.

Organisational benefits:

Preparedness

Have comprehensive plans in place that enable your organisation to successfully confront and overcome a range of complex, unexpected challenges.

Risk mitigation

Demonstrate to boards, shareholders and other stakeholders that you have procedures and systems in place to handle a range of risks, thereby mitigating the impacts those risks may have on your organisation.

Cost effectiveness

Insufficient planning for unexpected challenges can cost your organisation dearly, both financially and in terms of reputation. Planning for a range of challenges can ensure you have the capacity to contend with such challenges efficiently and effectively, reducing the costs to your organisation.

Achieve long-term resilience

Appropriate planning is essential for any organisation wishing to ensure it will be resilient in the face of unexpected challenges, thereby helping it achieve long-term success.

CyberCX's award winning and experienced business continuity consultants can guide you through the process of reaching and maintaining the ISO 22301 standard so that the impact of a major incident on your business operations, service to customers, reputation and revenue is minimised.

Our business continuity program uses the ISO 22301 as the framework which ensures your plans follow best practices and align to the standard's requirements.

The program consists of five key services:

▶ **Risk reduction**

CyberCX can work with you to identify and assess your business risks which could result in an incident and/or disaster.

▶ **Incident management planning**

CyberCX can build and guide the incident management planning process, from frameworks, to plans and playbooks.

▶ **Business continuity planning**

CyberCX has the expertise to help you develop and maintain appropriate business continuity plans (BCP) that are tailored to your organisation's needs.

▶ **Third party supplier resiliency**

CyberCX has extensive experience of working with supply chains to implement controls and reduce the risks to businesses.

▶ **Pandemic planning**

CyberCX can work with you to establish a pandemic planning that is an integrated response with your incident management and BCP.

Business Continuity experts you can rely on.

- ▶ Highly specialised practitioners who are experts in supporting businesses to reach and maintain the ISO 22301 standard.
- ▶ A bespoke program designed around your organisation's business requirements and culture.
- ▶ Extensive track record of successful certification across industry sectors and geographical territories.
- ▶ Award winning programs and solutions.
