CyberCX

Managed Security Services
Security Operations Centre (SOC)

Always on, market-leading MSS SOC expertise delivered as a service, enhancing the protection of all your digital assets.

Obtaining appropriate cyber security skills is one of the most pressing challenges facing any organisation with a digital footprint today. With specialist skills in such short supply, organisations need the assurance of experienced professionals who are passionate about protecting your interests.

Ideal for

Any organisation needing end-to-end cyber security operational support.

Why CyberCX MSS SOC?

CyberCX's Managed Security Services (MSS) Advanced Security Operations Centre (SOC) leverages extensive understanding of digital threats. Our in-depth, cross sector understanding can be applied to help organisations build and enhance their cyber security resilience. CyberCX partner with our clients to ensure security initiatives align with organisational goals and business requirements, all while minimising cost and disruption so your team can focus on creating new opportunities to grow your business.

We specialise in managing complex and emerging technology solutions that deliver optimised connectivity and cyber security, using the latest technology to give you a reliable service, with transparent reporting and proactive response from our support team.

CyberCX combines industry leading monitoring and detection technologies with threat hunting cyber intelligence and bespoke capability development to detect and counter cyber exploitation.

Organisational Benefits:

Unified expertise, delivered end-to-end.

Take advantage of expertise as a service at unprecedented scale and depth, with the combined knowledge of the UK's top cyber security specialists.

Always-on protection.

Know that your organisation is always protected by our 24x7x365 Cyber Security Operations Centres.

Assurance to achieve real business outcomes.

With leading cyber security experts in your corner. Organisations can do more than simply comply with security regulations, they can deliver real business value.

What CyberCX offers

Managed Onshore Cyber Security Operations

Anticipate and rapidly identify threats with security incident and event management (SIEM) monitoring, triage, and alerts that immediately notify organisations of cyber threats across digital assets.

▷ Multi-platform SIEM management and integration

▷ Continuous threat hunting

▷ Breach and attack simulation

▷ Digital brand protection

Vulnerability Management

Stay protected from ever-evolving cyber threats with timely identification, classification and continuous scanning of your digital assets for vulnerabilities, with reporting and recommendations tailored for your specific teams.

Endpoint Detection and Response (EDR)

Boost network visibility with the installation and service management of an endpoint agent, providing continuous monitoring and rapid response to malware and cyber intrusions.

▷ Effective response during compromise

▷ Remote quarantining of rogue hosts

▷ Live forensics and triage

▷ Ability to trigger SIEM monitoring and alerting rules as part of a 'single pane of glass' solution

Threat Intelligence

Stay ahead of evolving threats in your industry to make inform strategic decisions and future investment, with threat intelligence research, investigation, and reporting as a service.

Managed Security Services SOC capability that you can rely on.

▷ 100% cyber threat protection service.

▷ Trusted security operations delivered by security cleared and vetted personnel.

▷ Advanced Cyber Security Operations Centres, with integrated SmartSOC robotic process automation for multiple vendor solutions.

▷ Extensive knowledge of known threat vectors and can help organisations eliminate 99% of false positive alerts.

▷ Successful delivery of SOC across multiple industry sectors.

▷ Tailored and industry specific threat intelligence, research and analysis.

▷ Sourcing from private access intel sharing groups, open-source forums, private intelligence feeds and more.
