

# Privacy and Data Protection

Maintain compliance and protect your data with expert guidance and services on managing and processing data.

Data Protection is not just a legal requirement, it is also crucial to maintaining the reputation and integrity of your organisation.

## Ideal for

Any organisation that controls and/or processes data, including financial information, staff HR records, customer information and credit card details. Organisations that manage data transfers.

## How we deliver

In person onsite, and remote.

## Why CyberCX data protection?

CyberCX will help you protect your data and assist you with meeting regulatory data compliance. Regardless of the where you are with your data protection compliance programme we can support your business requirements.

Wherever you are based in the world we offer a range of services and our expert consultants will work with you to assess and understand your individual needs to ensure your data remains protected.

## Organisational benefits:

### Prevent costly data breaches

Data Protection will increase the efficiency of your business by preventing data breaches and handling any potential incidents in a timely manner. Staff training and awareness programs can also increase staff understanding preventing costly breaches.

### Meet your legal requirements

Have the confidence that your organisation is compliant and you will not be at risk of occurring large penalties and fines for breaking data protection laws.

### Increase customer confidence

By demonstrating to your customers that you proactively address data privacy concerns you can inspire customer confidence and give your organisation a competitive edge.

With comprehensive guidance we deliver these services and functions:

▶ **Outsourced Data Protection Officer (DPO)**

designed to satisfy your organisation's legal responsibility to designate a DPO, whether that be mandatory or voluntary.

▶ **Data Protection Support Function**

providing you with support and guidance for all your data protection queries.

▶ **Data Protection Gap Analysis and Implementation Plan**

helping you to identify your current data protection and privacy position and execute your plan.

▶ **Data Mapping**

helping you to understand what data is being collected, where it is being stored and the conditions in which it is stored across your business.

▶ **Data Protection Impact Assessment (DPIA)**

helping you identify and minimise the data protection risks of a project.

▶ **Supply Chain Due Diligence**

Our expert data protection consultants can work with you to conduct detailed due diligence on your suppliers.

▶ **Lawful Basis Assessment**

Our experts can work with you to assess each of your data processing activities and decide which lawful basis you need to choose for the data processing you conduct.

▶ **Data Protection Training**

We can provide organisation-wide education and training to ensure your employees understand their responsibility in keeping personal data safe and secure.

▶ **Additional Transfer Mechanism**

We can help you decide if you require additional transfer mechanisms and help you to produce them.

**Data Protection experts you can rely on.**

- ▶ Highly specialised and qualified practitioners who are experts in data protection with years of industry experience.
- ▶ Experience in all industry sectors and specialising in Technology, Publishing, Legal, Healthcare, Manufacturing, Professional Services, Utility, Charity, Aviation.
- ▶ Trusted services to keep personal data secure and prevent data breaches.
