

Governance, Risk and Compliance

Governance, Risk and Compliance (GRC) initiatives are increasingly the critical business investment for long-term growth, value and sustainability.

Regulations, stakeholder expectations, and standards need to be appropriately understood, selected, interpreted and deployed in line with your unique business context to deliver value.

Ideal for

Any organisation concerned with GRC requirements.

How we deliver

In person onsite, and remote.

Why CyberCX GRC?

GRC is a crucial investment for long-term growth, value and sustainability. However, right-sizing your efforts to meet regulations, stakeholder expectations, and standards can be complex and costly, and it's easy to do too much or too little.

If you're looking to develop your cyber security strategy, planning, policies and processes we can help you bring them in line with global industry standards.

Working as part of your organisation, we help align your governance, contractual, and compliance requirements and expertly manage your cyber security risk.

Our specialisations include: ISO 27001, ISO 22301, PCIDSS, PSPF/ISM, IRAP, NIST CPS:234, privacy, business risks, and audit security governance.

Receive comprehensive advice, packed with industry insights and designed to build business performance and resilience into the core of your business operations.

Organisational benefits:

Make better decisions

Make better risk and investment decisions with robust and balanced assessment across business and technology, to manage the downside and upside of your cyber risk posture.

Confidently meet compliance regulations.

Achieve, maintain and prove compliance with a raft of internal, industry, and international standards and benchmarks.

Strengthen long-term governance

Protect your ability to trade and operate in the long term by leveraging appropriate and effective governance frameworks.

CyberCX GRC consultants are experts who employ a range of methodologies suitable across business or specific to industry sectors.

With comprehensive guidance through every step of your GRC journey, we deliver these services:

- ▶ Business Resilience to ensure continuity during disruption, from supply chain to critical business operations, disaster recovery to incident response plans.
- ▶ Risk Management services that are insightful, pragmatic, and balanced to help manage the tradeoff between risk and return.
- ▶ Governance services to create and build governance frameworks, policies and processes based on deep insight into industry trends, your security posture, and your desired outcomes.
- ▶ Compliance and audit services to achieve, maintain, and prove your compliance over time with rigorous, embedded compliance processes.
- ▶ Privacy services to help you navigate the privacy ecosystem with confidence, including:
 - Privacy policy development
 - Domestic and international privacy standard
 - compliance (APP, GDPR)
 - Notifiable Data Breach (NDB) readiness
 - Privacy Impact Assessments (PIA)

Our specialisations:

GRC capability you can rely on

- ▶ We operate at scale to support your GRC efforts across the globe or around the corner, leveraging our network of 750+ cyber security professionals.
- ▶ Our highly qualified GRC experts draw on years of experience shaping the largest enterprises and government agencies, through to the smallest operations.
- ▶ We focus on embedding processes that deliver value over the long term to all levels of your organisation.
- ▶ All CyberCX GRC solutions are designed to help manage risk, enhance control over operations, improve operational resilience, and increase profitability.
- ▶ Get help to comply with industry and regulatory frameworks at the right level of commitment and investment to ensure you meet the legal, regulatory and security obligations and expectations of your stakeholder communities.
