

# Managed Security Services

CyberCX delivers expert managed solutions to help organisations control risks and deliver embedded capability to monitor, protect, detect and respond to individual security needs.

Cyber Security is a core business requirement for most contemporary organisations as the threat landscape continues to grow and evolve. Risks are accelerating and compliance obligations increasing, while internal skills and capabilities remain static for many organisations. Managed security solutions are a cost effective way to defend and protect critical digital assets so organisations can concentrate on growing its core business.

## Who should engage?

Organisation seeking to safeguard digital assets whilst containing cyber expenditure.

## Why CyberCX MSS?

CyberCX offer a complete suite of Managed Security Services (MSS) to provide your business with expert, cost-effective protection. We can complement your in-house abilities or develop bespoke and fully managed solutions.

CyberCX understands that organisations need secure technology and systems to deliver business outcomes. Our MSS solutions ensure that your digital assets and operations always remain cyber resilient.

We empower your business by managing your security.

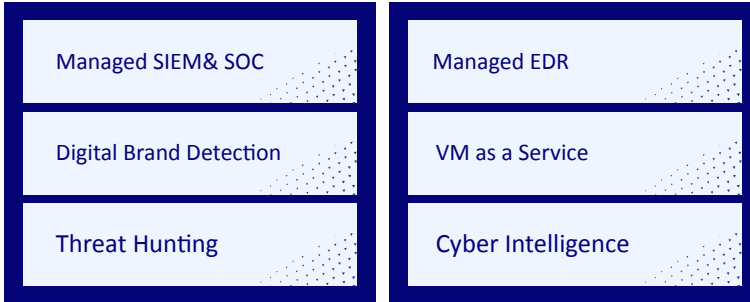

## Organisational benefits:

- ▶ Unified expertise, delivered end-to-end.
- ▶ Free your teams to grow your business and create opportunity, allowing you to harness your technology investments to enable innovation and growth.
- ▶ Secure your Network and Security operations centres with professionals you can depend on, ensuring you have access to your critical systems when you need it.
- ▶ Access transparent reporting based on measurable metrics that can act as a foundation and driver for co continuous improvement.
- ▶ Navigate and ease the burden of operating in increasingly complex regulatory and threat environments.
